

Black Color Indoor Small Desktop Air Purifier For Family Use

Our Product Introduction

for more products please visit us on envi-tek.com

Basic Information

- Place of Origin: China
- Brand Name: Envitek
- Certification: ETL CB EMC LVD ERP ROHS
- Model Number: KJ050GE-C7
- Packaging Details: color box+master carton
- Delivery Time: 30
- Payment Terms: L/C,T/T,Western Union,MoneyGram
- Supply Ability: 30000 PCS/MONTH

Product Specification

- Name: Family Use Small Air Purifier
- Color: Black Or Customed
- Control: Touch Control Panel
- Voltage (V): 100-240V 50/60 Hz
- Type: Hepa-Filter
- OEM&ODM: OK
- Highlight: **black color desktop air purifier,
small desktop air purifier,
indoor desktop air purifier**

The
first

layer traps large particles like lint and dust flakes. Then, the medical-grade HEPA filter steps in, removing up to 99.97% of microscopic allergens and pollutants. The final activated carbon layer eliminates odors and harmful chemicals, leaving your air pure and

fresh.

What makes it truly stand out is its portability. You can easily move it from the bedroom to the study or the living room, ensuring clean air wherever you are. It's also incredibly easy to operate. With just a few simple button presses, you can switch between

different modes according to your needs.

The noise level is a non-issue with this purifier. Even on the highest setting, it produces only a gentle hum. In sleep mode, it's almost silent, allowing you to enjoy a peaceful rest while it works its magic on the air.

Hepa Filter Working Principle

Hepa filtration is a commonly used filtration technology in air purifiers. The Hepa filter is composed of very fine organic fibers interwoven together, has a strong ability to capture fine

the role of filtering and purifying the air. It can effectively filter particles of 0.3 microns in the air. The filtering effect on particles $\geq 0.3\mu\text{m}$ can reach 99.9%, and the filtering effect on PM 0.1 particles can reach 99.99%.

The higher the grade of the Hepa filter, the better the filtering

ring effect. Generally, air purifiers on the market use filter elements of grades H12 and H13. Hepa filters can also be combined with other filtration technologies, such as activated carbon filtration, to improve the performance of the air purifier.
